WL Ice 900

The ultimate ice & water solution

Making water and ice great

The WL900 combines design with the latest technology. With a separate water delivery and a daily ice production of 44lbs, plus additional storage of 8lbs, this machine is perfect to cater for a high number of users. It's the ideal choice for busy workplaces and environments.

Advanced technology

This dispenser utilizes reverse osmosis to give you fresh water and ice.

Ultimate filtration

Reverse osmosis is the ideal filtration to use when the water quality is unknown or is known to carry contaminants in the water. Providing an even higher level of filtration over carbon, RO effectively removes dissolved particles (like acid, salts, nitrates, pesticides, arsenic).

*Where applicable

Expert ice-making technology

The WL Ice 900 is the worlds first ice-making technology within a water purification system. It provides crystal clear gourmet ice, produced with the freezing point method, and clean fresh tasting water.

Elegant Design

Characterized by sleek, streamlined lines and premium glossy finishing, the WL900 stylishly complements the interiors of even the most sophisticated workplaces.

Features

A versatile dispenser for ice and separate hot, cold and ambient water delivery. NEW user interface to prevent the inadvertent disabling of critical functions

Default function to cold: designed to automatically convert to cold water mode when in queue

Integrated ice-making and water-cooling system designed for high energy efficiency

Continuous water dispensing with a single touch

Leak detection system reducing risks of accident

Modern control panel with touch sensitive buttons for easy operations

Blue LED lighting function indicators

NEW Stainless steel auger periodically agitates the ice bin to reduce clumping

NEW design allows for efficient cleaning and sanitizing of the machine on location
